# 4.1 Description of first aid measures

Health hazard is no minimal, being neither irritating, corrosive, volatile, nor toxic. Effects of over exposure: There are no hazards under normal use conditions. Observe all user considerations and safety measures stated on the packaging. In case of any health problem or uncertainty seek medical attention and provide information from this Material Safety Data Sheet. Unconscious persons place in the stabilized position and observe the breathing. Never give any fluids to unconscious persons. Be careful when manipulating hot products - danger of skin burns.

	HTING MEASU	URES			
tinguishing me	edia				
table extinguis	hing media:	water spray, alcohol resistant foam, dry-powder, carbon dioxide			
suitable exting	uishing media:	direct water stream - could spread fire			
Special hazards arising from the substance or mixture           Flammable. Incomplete combustion and thermolysis may produce toxic, irritating and flammable decomposition products (such as carbon monoxide, carbon dioxide, sooth, aldehydes and other products of organic compounds decomposition, nitrous oxides, amonia). Do not inhale smokes.					
Advice for fire-fighters         Fire Fighting Procedures: Keep people away. Isolate fire and deny unnecessary entry. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of re-ignition has passed. Fight fire from protected location or safe distance. Move container from fire area if this is possible without hazard. If possible, avoid leaked was to enter sewage system or environment.					
Special Protective Equipment for Firefighters: Wear positive-pressure self-contained breathing apparatus (SCBA) and protective firefighting clothing (includes firefighting helmet, coat, trousers, boots, and gloves). Avoid contact with the material during firefighting operations. If contact is likely, change to full chemical resistant firefighting clothing with self-contained breathing apparatus. For protective equipment in post-fire or non-fire clean-up situations, refer to the relevant sections 6 and 8.					
		SE MEASURES			
	lucts (such as perposition, ni rice for fire-fi Fighting Proc osed container tion or safe di nter sewage sy cial Protective ective firefigh erial during fin- contained bre	lucts (such as carbon monoxid omposition, nitrous oxides, an <b>rice for fire-fighters</b> <u>Fighting Procedures:</u> Keep prosed containers and fire affect tion or safe distance. Move conter sewage system or enviror <u>cial Protective Equipment for</u> ective firefighting clothing (in erial during firefighting operation)			

No special requirements are needed. Observe all user considerations and safety measures. All unprotected persons should be restraint. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

6.2 Environmental precautions No special requirements are needed.

10.2	<b>Chemical stability</b> Mixture is chemically stable under normal conditions of storage and manipulation. Overheating may cause thermal decomposition.
10.3	Possibility of hazardous reactions
	Not known.
10.4	Conditions to avoid
	Not known.
10.5	Incompatible materials
	Not known.
10.6	Hazardous decomposition products
	Material does not decompose at ambient temperatures. Incomplete combustion and thermolysis may produce toxic,
	irritating and flammable decomposition products (such as carbon monoxide, carbon dioxide, sooth, aldehydes and other
	products of hydrocarbons decomposition, ammonia, nitrous oxides).

#### SECTION 11: TOXICOLOGICAL INFORMATION

#### **11.1** Information on toxicological effects

No adverse effects for human health are expected for the mixture under normal conditions of usage, the mixture is biologically inert.

#### a) Acute toxicity

Based on available data, the classification criteria are not met. Based on composition, the mixture has low acute toxicity and no adverse effects for human health are expected under applicable conditions of exposure.

<i>f</i> )	<i>Carcinogenicity</i> Based on available data, the	<i>Carcinogenicity</i> as a set of the classification criteria are not met.						
<i>g)</i>		<i>Reproductive toxicity</i> Based on available data, the classification criteria are not met.						
h)	<i>STOT-single exposure</i> Based on available data, the classification criteria are not met. Inhalation of dust loosened dust during manipulation can mechanically irritate airways. However, these effects do not require classification.							
<i>i)</i>	STOT-repeated exposure Based on available data, the classification criteria are not met.							
j)	Aspiration hazard Based on available data, the	classification cri	iteria are not met.					
SECT	ION 12: ECOLOGICAL IN	FORMATION						
	No adverse effects in the env	rironment are ex	pected for the mixture	e; the mixture is bio	ologically almos	st inert.		
12.1	<b>Toxicity</b> No data measured for the mix almost biologically inert.	xture. No advers	se effects in the enviro	onment are expecte	d for the mixtur	e; the mixture is		
12.2	<b>Persistence and degradabil</b> Within the environment, it is UV radiation. It is insoluble	almost inert ma	terial with a very slow	v decomposition. I	t decays slowly	when exposed to		
12.3	<b>Bioaccumulative potential</b> The mixture has no bioaccum	nulative potentia	վ.					
12.4	<b>Mobility in soil</b> No data for the mixture. Inso	luble in water, r	nobility in soil is not	expected.				
12.5	<b>Results of PBT and vPvB assessment</b> Results of PBT and vPvB assessment: The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII; no substances of the mixture in the amount of $\ge 0.1$ % are included in the Candidate List of Substances of very high concerns (SVHC).							
12.6	Other adverse effects not known							
SECT	ION 13: DISPOSAL CONS	BIDERATIONS	•					
13.1	Waste treatment methods It is recommended to dispose	e all rests in auth	norized dangerous was	ste facility. Disposa	al has to comply	all local legal		

requirements on wastes.

<u>Substance or mixture disposal methods:</u> Dispose in accordance with the valid waste legislation. Do not dispose as a common household waste. Dispose in a certified waste facility / recycle. According to the European Waste Catalogue waste codes are not specific for product,

	No information
d)	<i>Methods of evaluating information used for the purpose of classification</i> The substance was classified by expert judgment and conventional calculations methods in accordance with the Regulation EC No. 1272/2008 (CLP).
e)	Full wording of used Hazard Statements (H-phrases) not used
<i>f</i> )	Advice on any training appropriate for workers Before handling, storing or using the present substance for the first time, employees must be informed - common training for handling chemicals, occupational safety training.
g)	<i>Other information</i> Safety Data Sheet (SDS) is compiled in accordance with the Regulation EC No. 1907/2006 (REACH), Regulation EC No. 1272/2008 (CLP) and Commission Regulation EU No. 2015/830; and contains information on safety use, occupational health protection, and environmental protection. The information contained herein is given in good faith and is accurate to the best of knowledge at the date indicated above. This particular information applies on the product as supplied and may not be valid in mixtures with other substances. If used for other purposes as identified in this SDS, the distributor is not liable for any damage.
	The information given herein in no way dispenses the user from knowing and applying all provisions regulating his activity. The user bears sole liability for the precautions required when using the product. The regulatory texts indicated herein are intended to aid the user to fulfill his obligations. This list is not to be considered complete and exhaustive. It is the user's responsibility to ensure that he is subject to no other obligations than those mentioned.
